USA raus aus Washington, DC!

„If you consider that there has been an average of 160,000 troops in the Iraq Theater of operations during the past 22 months, and a total of 2112 deaths, that gives a firearm death rate of 60 per 100,000 soldiers -some of which were accidental .

The firearm death rate in Washington, DC is 80.6 per 100,000 for the same period. That means you are about 25 per cent more likely to be shot and killed in the US capital, which has some of the strictest gun control laws in the US, than you are in a combat zone like Iraq.

Conclusion: „The US should pull out of Washington, DC ."

Via [Fefe](), aber ich habe die [angegebene Quelle]() überprüft (Australian Shooter Magazine, 17.04.2009). Ist schon etwas älter und mittlerweile ein [running gag]().
