

The world's most secure text messaging app: surespot!

surespot
encrypted messenger

Ich habe heute Threema von meinem Smartphone geworfen und stattdessen [Surespot](#) installiert.

surespot is a secure mobile messaging app that uses exceptional end-to-end encryption for every text, image and voice message returning your right to privacy

- surespot is not associated with your phone number or email*
 - you can delete your messages from the receiving device*
 - send voice messages when your hands or eyes are too busy to text*
 - multiple identities on a single device to keep matters separated*
 - free messenger with no advertising and totally open source*
 - your identity is portable so you can transfer your secure conversations to other devices*
 - uses 256 bit AES-GCM encryption using keys created with 521 bit ECDH**
- * this means only you and the receiver can decrypt surespot messages*

Wer mit mir so Kontakt aufnehmen will: Mein Name ist Burks...
