Ich habe mir das Firefox-Add-on WorldIP installiert (Website): „The real location of web server and extended information about datacenter. Advanced Networking Tools. Anti-phishing solution. Security features against DNS spoofing and fake websites.“

WorldIP add-on is created to protect the user. We respect your privacy! and do not sell or pass your personal information to third parties.
1) Cookies
WorldIP add-on does not send any cookies to any web server.
2) Geolocation and Datacenter Databases
To display up-to-date information about physical location of a web server and data center, the WorldIP add-on uses API, it sends the requested IP addresses to api.wipmania.com. The format of API-request is IP-addr?hostname. To prevent the use of API from the name of add-on, we check that IP and hostname accord with each other.
Any other information about the site or user will not be sent to WIPmania, except for its domain name, that says about its IP address. IP addresses will be also used to correct the database. WIPmania do not collect any personal information

about visitors.

Gefällt mir.
