Trump is headed for a win

[The Independent](#) und die [Washington Post](#) lassen Professor [Allan Lichtman](#) zu Wort kommen, der den Ausgang aller Präsidentchafts-Wahlen in den USA seit 1984 richtig vorhergesagt hat. Trump werde wahrscheinlich gewinnen.

„The Keys to the White House" is a historically based prediction system. I derived the system by looking at every American presidential election from 1860 to 1980, and have since used the system to correctly predict the outcomes of all eight American presidential elections from 1984 to 2012.

The keys are 13 true/false questions, where an answer of „true" always favors the reelection of the party holding the White House, in this case the Democrats. And the keys are phrased to reflect the basic theory that elections are primarily judgments on the performance of the party holding the White House. And if six or more of the 13 keys are false — that is, they go against the party in power — they lose. If fewer than six are false, the party in power gets four more years.

Die „Experten" [sind sich aber auch einig](#), dass Vorhersagen schwierig sind, insbesondere die Zukunft und die nächsten Wahlen betreffend.
