

# An Easy Way For Women To Have More Orgasms

Symbolfoto, Quelle: somewhere on the Internet

[Archives of Sexual Behaviour](#): „Women who have sex with women (WSW) are more likely to report experiencing an orgasm during partnered sex, compared to women who have sex with men (WSM).“

Zusammengefasst gibt es das auf [IFLScience](#): „There’s An Easy Way For Women To Have More Orgasms, But Men Aren’t Going To Like It“.

Alles fußt u.a. auf der [Untersuchung](#) (2017): „Differences in

## Orgasm Frequency Among Gay, Lesbian, Bisexual, and Heterosexual Men and Women in a U.S. National Sample“.

Fazit: „Compared to women who orgasmed less frequently, women who orgasmed more frequently were more likely to: receive more oral sex, have longer duration of last sex, be more satisfied with their relationship, ask for what they want in bed, praise their partner for something they did in bed, call/email to tease about doing something sexual, wear sexy lingerie, try new sexual positions, anal stimulation, act out fantasies, incorporate sexy talk, and express love during sex.“

Schon klar.
