

Analytical Organization

Umbrella

Neu in der Blogroll: [South Front](https://southfront.org).

SouthFront: Analysis & Intelligence is a public analytical umbrella organization created and maintained by a team of experts and volunteers from the four corners of the Earth. SouthFront focuses on issues of international relations, armed conflicts and crises. The organization provides military operations analysis, military posture of major world powers, and other important data influencing the growth of tensions between countries and nations.

We try to dig out the truth on issues which are barely covered by the states concerned and the mainstream media.

The SouthFront Team believes that not only well-paid "professional journalists", but common people with inquisitive minds are able to produce balanced content in a modern

information-oriented society.

Alles nur Propaganda vermutlich.
