Prigozhin pilot had post-vaccine myocarditis, heart attack may be cause of crash.

Cases of myocarditis and pericarditis have been observed following receipt of COVID-19 vaccines. Evidence from multiple monitoring systems around the globe support a association between mRNA COVID-19 vaccines and myocarditis.

A private jet traveling from Moscow to St. Petersburg crashed on Wednesday in Russia's Tver Region. The Russian Emergencies Ministry said all 10 people on board had died. Rosaviation has since said that Evgeny Prigozhin, the head of the Wagner Private Military Company, was listed among the passengers.

"The Embraer plane was flying out of Sheremetyevo to St. Petersburg. There were three crew and seven passengers on board

Jetzt ist es raus: Der Pilot der abgestürzten Maschine hatte einen Impfschaden, [Myokarditis](#) und auch noch einen Herzinfarkt. Und während des Absturzes haben die anderen [beiden Piloten](#) teilnahmslos herumgesessen (via [Fefe](#)).
