

The act of sexual reproduction, typically

Mir fiel heute nichts ein. Das Publikum wird vermutlich wissen, dass [Assange frei](#) ist.

Also hetzte ich die KI (ChatGPT) auf die KI (Midjourney) mit dem Befehl, der Akt der geschlechtlichen Vermehrung solle beschrieben werden

In Homo sapiens, the act of sexual reproduction typically begins with sexual intercourse, where the male erect penis is inserted into the female vagina. During intercourse, stimulation leads to ejaculation, whereby sperm, contained in seminal fluid, is released into the vagina. The sperm then travels through the cervix and uterus into the fallopian tubes, where fertilization may occur if an ovum (egg) is

present. If a sperm successfully penetrates the egg, fertilization results in a zygote. This zygote eventually implants in the uterine wall, developing into an embryo and later a fetus, culminating in childbirth. –s 750

Das Ergebnis war zwar nicht, wie ich es erhofft hatte, aber wie erwartet.
